

VISION

STUDENT INFORMATION SYSTEM

**SIMPLIFIED STUDENT
DATA MANAGEMENT**
designed to support and
engage your school community

WORK BETTER

WHY VISION?

Vision SIS empowers school administrators, educators, parents, and students to turn student information into valuable insights, meaningful conversations, and positive outcomes.

Work better, together

Be more efficient by working in a single, unified student data platform that manages every aspect of your school. Collect, organize, share, and report on all of your data with ease.

Simplify IT operations

Vision's flexibility and integrations unify all the systems that keep your school running. Make your day easier with one central system.

Produce accurate data

Whether you're reporting on an individual student's growth or attendance trends over time, Vision's data and accountability reporting is accurate, so funding is optimized and predictable.

Turn data into action

Vision's standard and custom reports reveal crucial statistics and hidden trends, so that schools can make the metric-backed decisions they need.

Share data with ease

Display and plan around trends with attendance, behavior, and academic visualizations. Self-service portals enable teachers, parents, and students to access information at any time.

Get parents on board

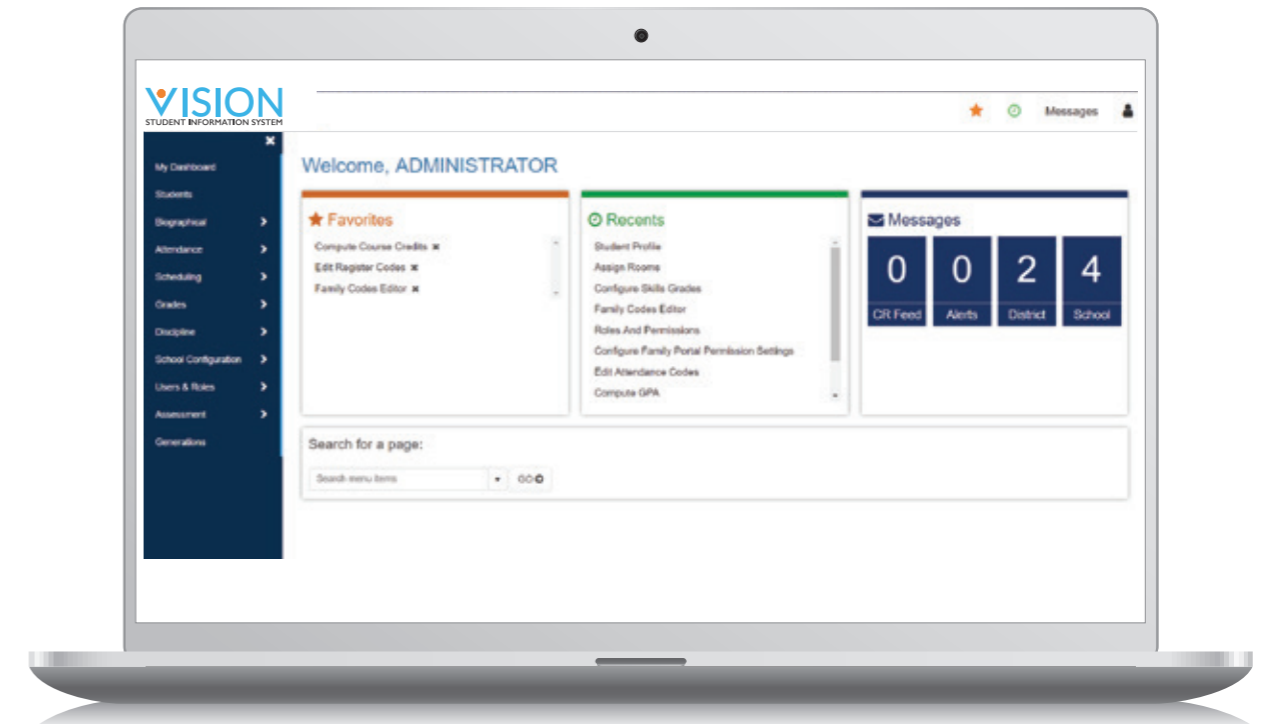

Engage parents with Vision's multilingual and mobile applications. Send mass messages, integrated online forms, fee notices, surveys, and more.

INVEST IN A SECURE SYSTEM

THAT BENEFITS EVERYONE

Vision SIS provides fast, role-based access to data, reports, and functions through web and mobile applications for students, parents, teachers, administrators, and staff. Vision SIS enables you to see just the data you need to serve the students in your care.

- o Classroom management
- o Automated scheduling
- o Mobile applications
- o Health management
- o Payment portal
- o Automated school forms
- o Mass notifications
- o Front office management
- o Easy dashboards and analytics
- o Parent engagement and communications
- o Enrollment management
- o Multiple open standards
- o (SIF, Ed-Fi, IMS, One Roster)
- o State and accreditation reporting

AVAVAVAV Vision SIS allows each role to **integrate and communicate.**

TEACHERS

- o CLASSROOM MANAGEMENT
- o REAL-TIME ROSTERS

- o ENROLLMENT PROJECTION
- o COMMUNICATIONS
- o LOTTERY MANAGEMENT

INCREASE THE BANDWIDTH FOR YOUR IT TEAM

As part of Vision SIS's low per-student fee, our FERPA-trained team supports all of your student information activities.

Vision SIS uses redundant data storage, off-premise backups, state of the art servers, high speed Internet backbone, 128-bit SSL encryption, all hosted in secure data centers with 24/7 system monitoring.

- o 99.99% uptime
- o Security system & video monitoring with 24X7 secure swipe card access
- o High capacity fiber optic circuits with redundant separate pathways
- o Climate controlled facilities
- o INERGEN® and air evacuation fire suppression
- o Uninterruptible power supplies
- o Backup generators for prolonged power outages

LISTEN, LEARN, AND GROW WITH A SYSTEM TAILORED TO YOUR SCHOOL COMMUNITY

The Vision SIS team has supported educators for over 40 years so we understand that no school or classroom is exactly the same. That's why Vision SIS is built to support such a wide array of configuration options, so we can personalize our applications to suit your school's unique culture.

Vision's flexibility includes integration with hundreds of other applications, and the list keeps growing. From Lunchtime to LMS, we can help you build the school you want for the students you serve.

PUT THE POWER OF DATA INTO EDUCATORS' HANDS

Vision delivers timely information presented in meaningful ways on any device, so teachers, staff, and administrators can do their jobs more easily and confidently. Create custom dashboards and analysis to support daily activities or strategic initiatives, or find the data you need in-line within the application through over 250 pre-designed reports.

Get all the data you need at a glance. Comprehensive views of demographic, attainment, attendance, and behavior data can be correlated, filtered, graphed, and published. The resulting PDF, Excel, or web-based dashboards are ready to use so you can make decisions with confidence. Vision by CR provides a complete, web-based, self-service reporting experience.

Work with Vision Dashboards and Reports to:

- o Create charts, tables, and other visualizations of school and district data.
- o Save and manage visualizations in a library for easy reuse.
- o Combine visualizations into publishable dashboards.
- o Publish reports that can be shared with specific groups.
- o Schedule reports for automatic generation and distribution.

ENHANCE THE CLASSROOM EXPERIENCE

The easier it is for teachers to manage their classrooms, the more time they have to engage with students. And the better the information teachers have at their fingertips, the better they can engage their students in learning.

Vision SIS helps teachers:

- o Provide families with mobile views of classroom information like assignments and grades.
- o Address the needs of the Whole Child through a comprehensive student profile.
- o Improve behavior through automatic discipline alerts and dashboards.
- o Spend less time on grades and class administration with easy-to-use tools that help manage the whole classroom and engage parents when needed.

SAVE TIME

STREAMLINE ADMISSIONS, REGISTRATIONS, AND FORM COLLECTION

Help parents easily and effectively receive and provide important information so they can make better decisions around their child's educational process.

From collecting and managing parent inquiries to accepting and reviewing registration information to sending out timely surveys, Vision Admissions and Forms saves administrators time and reduces errors when communicating with families.

- o Design forms to display desired school logos, images, and fields.
- o Save parents time with pre-populated forms that reflect previously submitted information.
- o Communicate better through automated email responses and workflows, letting parents know what they need to do next.
- o Run automatic validation checks and reduce review time so staff can process form data in a fraction of the time.
- o Create dynamic surveys to collect parent, student, and staff feedback.

**STAY
UPDATED**
SO YOU CAN
MAKE THE
MOST OF
TODAY

With Vision, you can see what's happening with students right now through real-time reports and early warning dashboards that help you to identify and respond to changes in a student's situation.

PARTNER WITH EXPERTS
WHO ARE INVESTED IN YOUR SUCCESS

From onboarding and implementation to training and support, Vision SIS has a team of experts dedicated to ensuring your happiness and satisfaction with your school information system.

Whether you're onboarding new users, deciding on gradebook configurations, or designing transcripts, our support and services team is one of the most experienced in the industry. We have guidance counselors, school IT directors, data stewards, teachers, and application support professionals just a phone call away.

IDENTIFY TRENDS

SO YOU CAN
PLAN FOR THE
FUTURE

Pinpoint patterns, improvements, and opportunities to grow. Through school-centric data management, reporting, and analytics, Vision equips you to establish your own vision for creating better learning environments.

TAP INTO DATA

WORK THE WAY YOU WANT TO

In our 40 years of serving educators, we're proud to say that we've built Vision SIS to be configured to virtually any school.

Learn more about how Vision SIS can help your school or district manage data, communicate with one another, and make data-driven decisions to create a more effective learning environment and help more students succeed.
